

Lena Neij

Lena Neij is Professor at the International Institute for Industrial Environmental Economics (IIIEE) at Lund University, Sweden. Her research is focused on the dynamics of the energy systems and the analysis of energy and climate policies at different levels of society. The research, which is interdisciplinary, focus on renewable energy technologies, energy efficiency and sustainable urban development. A special focus is on the role of cities in governing climate change, the transformative capacity of municipalities, strategies of local mitigation policy, and interventions for local learning.
